Getting started

Starting the app

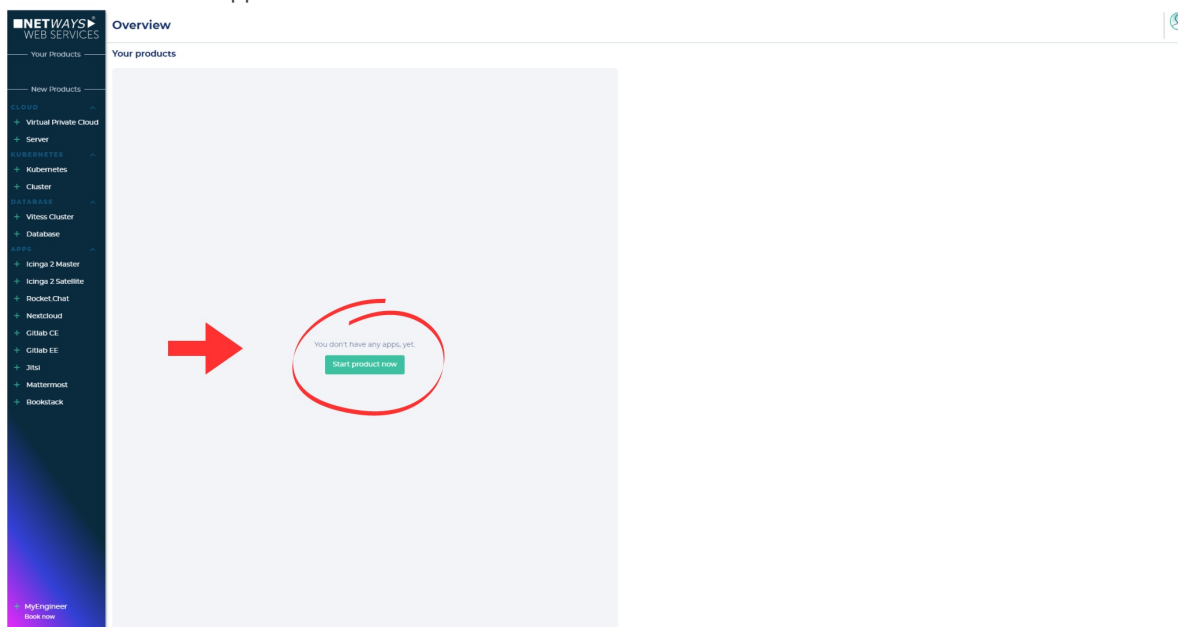

Create an account on [NWS Customer Interface](#).

- After finishing your registration, you have two possibilities to start your app:

- Click on the desired service at the left tool bar

- Click on the "start app now"-button and choose the desired service

- Now name your instance, choose a plan and accept the terms of conditions -> press down-right "create"-button

- Now your app is beeing created ->

this may take about 3-4 minutes

- When the circle turns from grey to green, you are ready to go (may be you have to refresh your browser)

[Faq](#)
[Blog](#)

Good to know

- 1 Configuration options let you set up BookStack to fit your use case. You can change the name, logo, and colors in the settings.
- 1 BookStack lets you mark a page as a template so its content can be easily reused when editing and creating pages.
- 1 BookStack's page editor has a built-in diagrams.net drawing feature that makes it quick and easy to create diagrams in your documentation.

Logging in

- You no longer need a separate password to log in to Bookstack. This works automatically via our NWS ID.
- just click on the Login now - link or the Endpoints Web-Link or the "Go to App"- button to get to your Nextcloud instance

Administrative Tasks

Customization

1. Subdomain

Just go to your Bookstack app in the [NWS Customer Interface](#) and click on "Settings". Open the "CNAME"- tab and fill in your subdomain.

The screenshot shows the 'Domain Settings' page in the NWS Customer Interface. The header includes the 'Stevos Bookstack' logo, a green status indicator, the identifier '7080-bookstack-61d8c', and a 'BASIC' plan label. A left sidebar contains links for 'Get started', 'Settings' (highlighted in green), and 'Manage Contract'. The main content area is titled 'Domain Settings' and includes instructions: 'Konfigurieren Sie Ihren eigenen Domain Name' and 'Sie können Ihre eigene Domain konfigurieren, die mit nws.netways.de endet, oder Ihre eigene benutzerdefinierte Domain speichern, die SSL / TLS-geschützt ist.' Below this, there is a section for 'CNAME' with a caret icon and a note: 'Der individuelle Domain Name ist begrenzt auf 50 Zeichen und darf nur Buchstaben, Zahlen und Bindestriche enthalten.' A 'Subdomain' label is followed by a text input field containing 'apps' and a dropdown menu showing '.apps.netways.de'. At the bottom, there is a 'Custom Domain' section with a downward arrow and a green 'Save Domain Settings' button.

2. Customer Domain

To setup your Customer Domain, the following things must be fulfilled /accomplished:

1. Domain must belong to you
2. You must set an A-record to IP `193.142.157.137` for the domain name
 1. You enter this in our [NWS Customer interface](#) at your Bookstack app under "Settings"
3. You specify if you want to have a Let's encrypt certificate or an SSL certificate

Upgrade to a bigger plan

Just go to your Bookstack app in the [NWS Customer Interface](#) and click on "Manage contract". Here you can upgrade to *Advanced* or *Premium* plan. If the *Premium* plan is no longer sufficient, contact us via sales@netways.de and we will provide you with a customized solution on OpenStack.
