Getting started

Starting the app

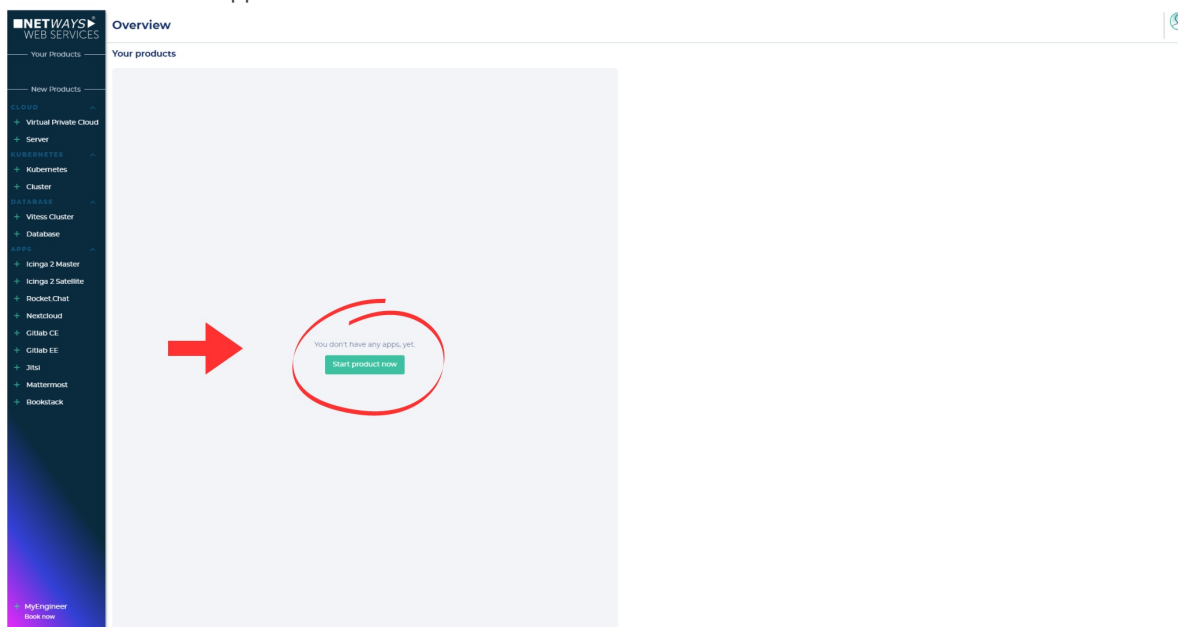

Create an account on [NWS Customer Interface](#).

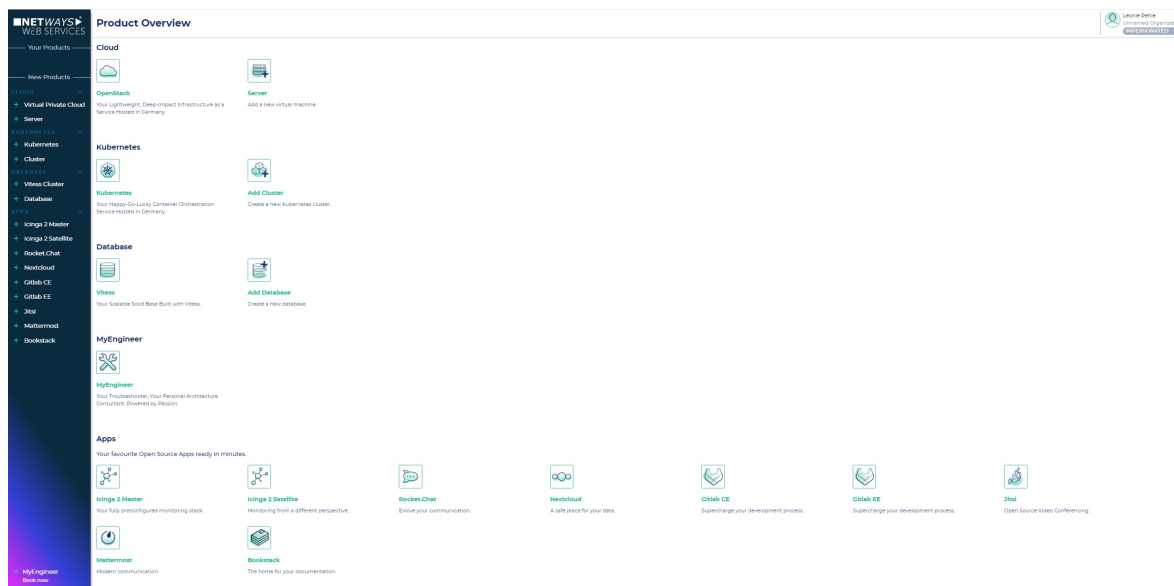

- After finishing your registration, you have two possibilities to start your app:

1. Click on the desired service at the left tool bar

2. Click on the "start app now"-button and choose the desired service

- Now name your instance, choose a plan and accept the terms of conditions -> press down-right "create"-button

Basic	Advanced	Premium
Users 5	Users 25	Users 100
Storage space (gb) 50	Storage space (gb) 300	Storage space (gb) 1000
9.99 €/month	24.99 €/month	99.99 €/month

☐ I accept the terms and the terms of privacy.

Enter your coupon Code if available

Coupon Code

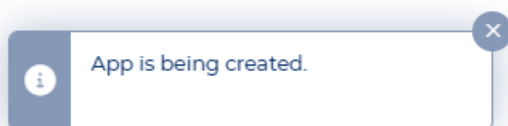

24.99 €/month

Test 30 days for free

Create

- Now your app is beeing created ->

this may take about 3-4 minutes

- Now you are ready to go

The screenshot shows the 'Access' tab of the Nextcloud installation interface. On the left, a sidebar contains links for 'Get started', 'Settings', 'Usage', and 'Manage Contract'. The main content area is divided into sections: 'Access' (with 'Credentials' and 'Endpoints'), and 'More Information' (with 'First Steps' and 'External Resources'). A green notification box in the top right corner states 'Nextcloud is ready'. The 'Credentials' section shows a user 'admin' and a password field with an eye icon to toggle visibility. The 'Endpoints' section shows a web link: <https://7888-nextcloud-45508-web.nws.netways.de>. The 'First Steps' section lists three steps: 1. Log in, 2. Upload files, photos and documents, and 3. Share it with others and collaborate. The 'External Resources' section includes links for 'Documentation', 'Faq', and 'Blog'.

Logging in

- You will find your credentials on the "Get started" tab -> To copy the password, you must first set it to visible
- now click on the Endpoints Web-Link (or on the "Go to App"- button) to get to your Nextcloud instance and enter your credentials

This screenshot is similar to the one above but includes two red arrows. One arrow points to the password field in the 'Credentials' section, indicating where to click to toggle the password visibility. The other arrow points to the web link in the 'Endpoints' section, indicating where to click to access the Nextcloud instance.

Administrative Tasks

Changing language

Just go to your Nextcloud app in the [NWS Customer Interface](#) and click on "Settings". The first point is setting up the "Default language".

Stevos NC 7080-nextcloud-45508 **BASIC**

Nextcloud Settings

Default Language

The default language is only used when the browser does not send any language and the user hasn't configured own language preferences. Existing users will not be affected by this option.

English

Save

Domain Settings

Configure your own Domain Name

You can configure your own domain ending with nws.netways.de or save your own custom domain SSL/TLS protected

CNAME ^

The custom domain name is limited up to 50 chars and allows only letters, numbers and dashes.

Subdomain

.nws.netways.de

Customization

1. Subdomain

Just go to your Nextcloud app in the [NWS Customer Interface](#) and click on "Settings". Open the "CNAME"- tab and fill in your subdomain.

Subdomain

.nws.netways.de

2. Customer domain

Just go to your Nextcloud app in the [NWS Customer Interface](#) and click on "Settings". Open the "Customer domain"- tab and fill in your domain.

You also have to choose whether you want to take a Let's encrypt or a Custom SSL certificate.

Get started	Customer Domain ^ Standardmäßig auf die von NWS generierte Domain gesetzt
Settings	Custom Domain Add the app with a custom domain <input type="text" value="www.yourdomain.com"/>
Usage	Let's Encrypt Use a certificate from "Let's Encrypt" <input type="checkbox"/>
Manage Contract	Custom SSL Cert Konfigurieren Sie hier Ihr eigenes SSL Zertifikat <div style="border: 1px solid #ccc; height: 200px; width: 100%;"></div>
	Custom SSL Key Konfigurieren Sie hier Ihren eigenen SSL Key <input type="text"/>

3. Changing title of Nextcloud instance

Just go to your Nextcloud app in the [NWS Customer Interface](#) and click on "Manage contract". Here you can change the title of your Nextcloud instance

Update Contract

Nextcloud App Store

We grant full access to the Nextcloud App store. We offer a certain portfolio pre-installed, but it's possible to uninstall, deactivate, install or activate, etc. all available apps.

Provided Office suite

We provide [Nextcloud office](#) which is based on Collabora.

Backups of the users' data?

No, there is only a backup of the configuration within the NWS Nextcloud SaaS Apps. The user data is stored in S3, where it is stored in triple redundancy in our Ceph. But no backup can be created from it. So if a user deletes his data by mistake, it cannot be restored.

If a backup of user data is essential for you, we can set up an individual Nextcloud instance on our OpenStack. The user data is stored on SSD hard drives, from which backups can be selected in the form of images with a freely selectable retention cycle. Just contact us [here](#), if you are interested in a managed Nextcloud on OpenStack.
