# Getting started

## Starting the app

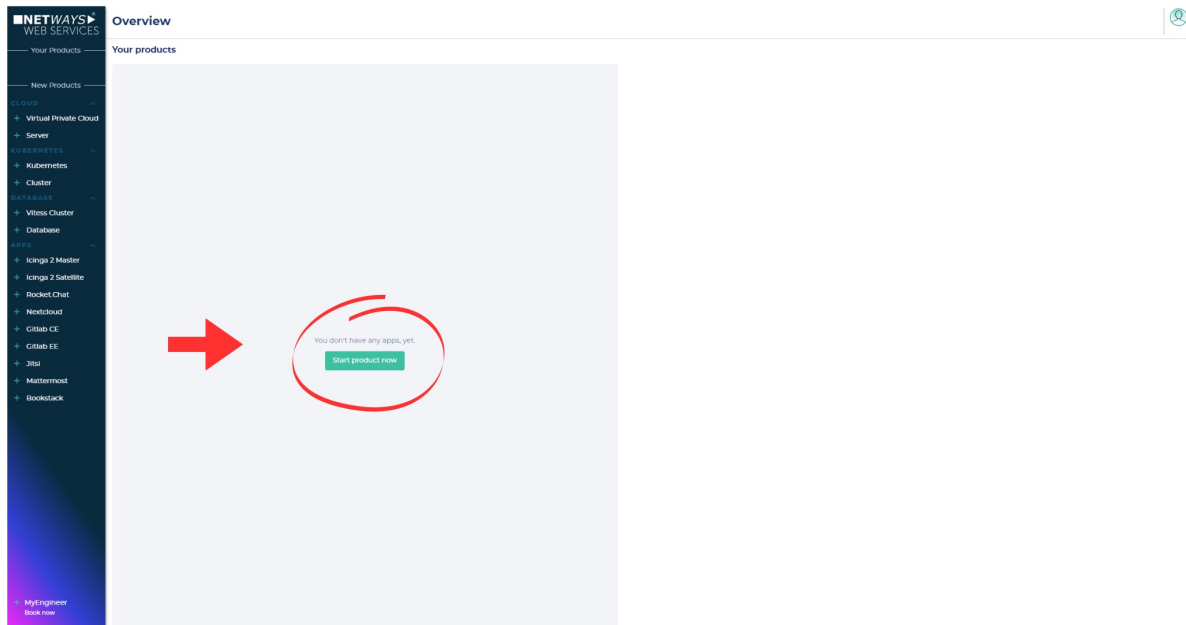

Create an account on [NWS Customer Interface](#).

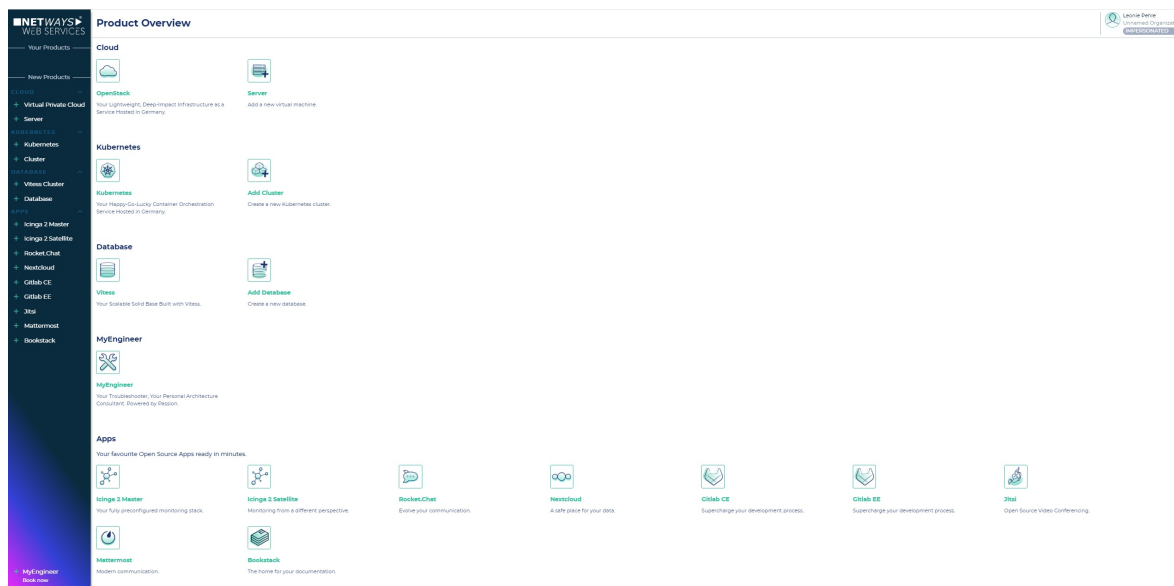

- After finishing your registration, you have two possibilities to start your app:

1. Click on the desired service at the left tool bar

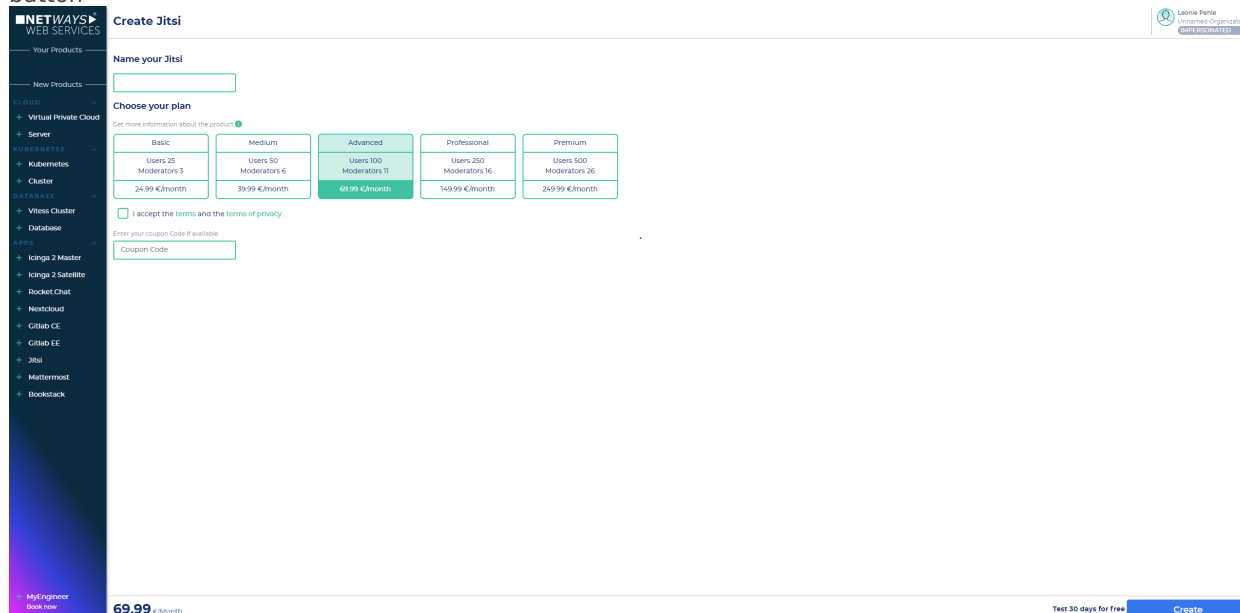

2. Click on the "start app now"-button and choose the desired service

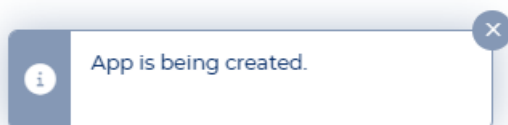

- Now name your instance, choose a plan and accept the terms of conditions -> press down-right "create"-button

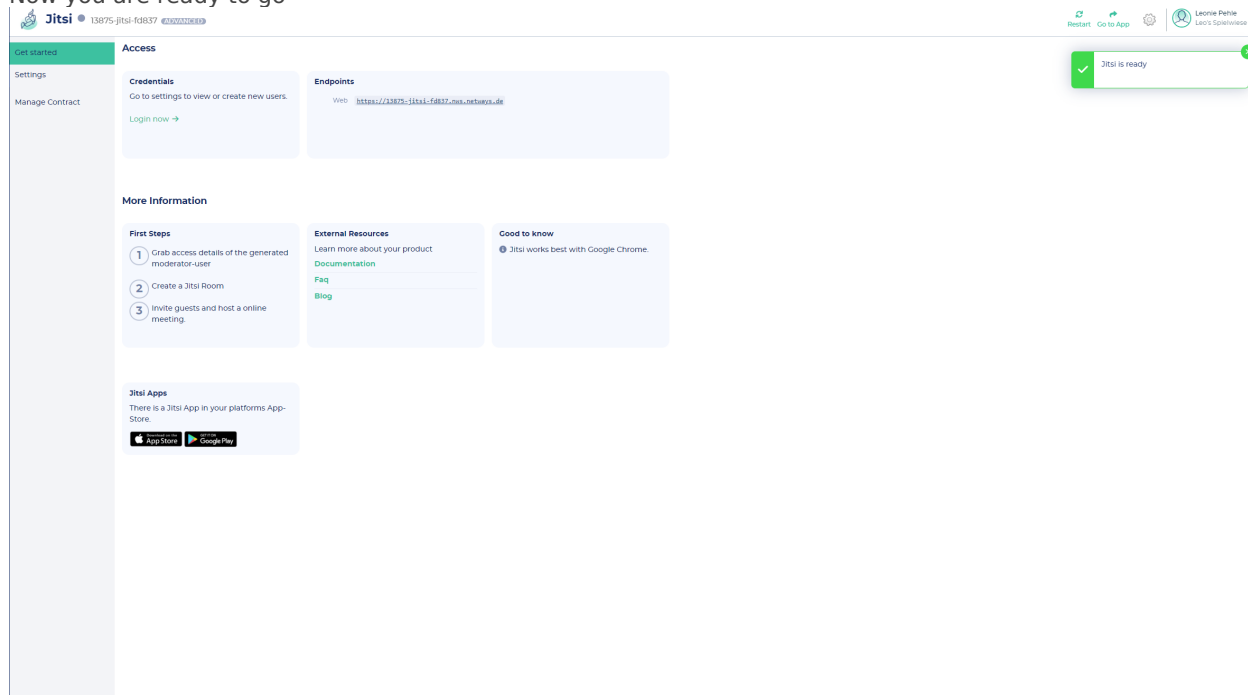

- Now your app is beeing created ->

this may take about 3-4 minutes

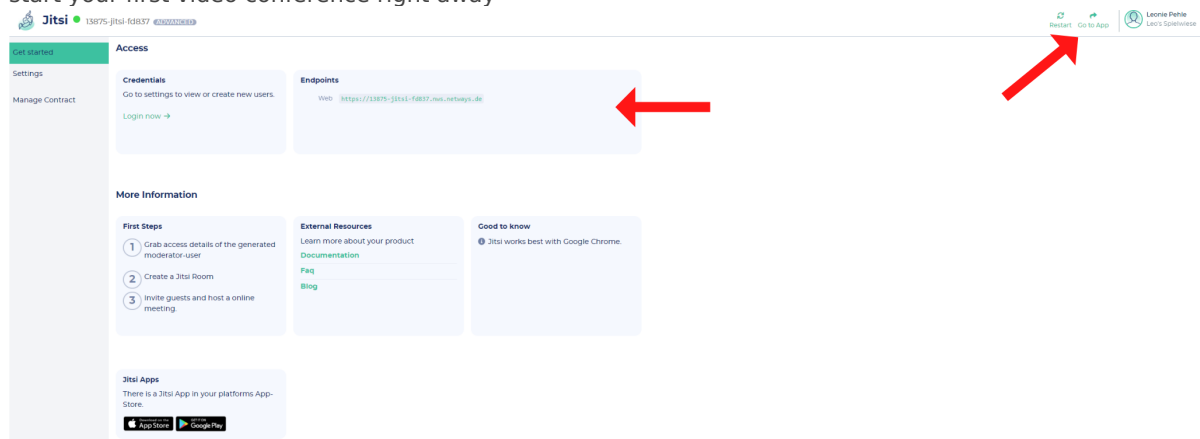

- Now you are ready to go

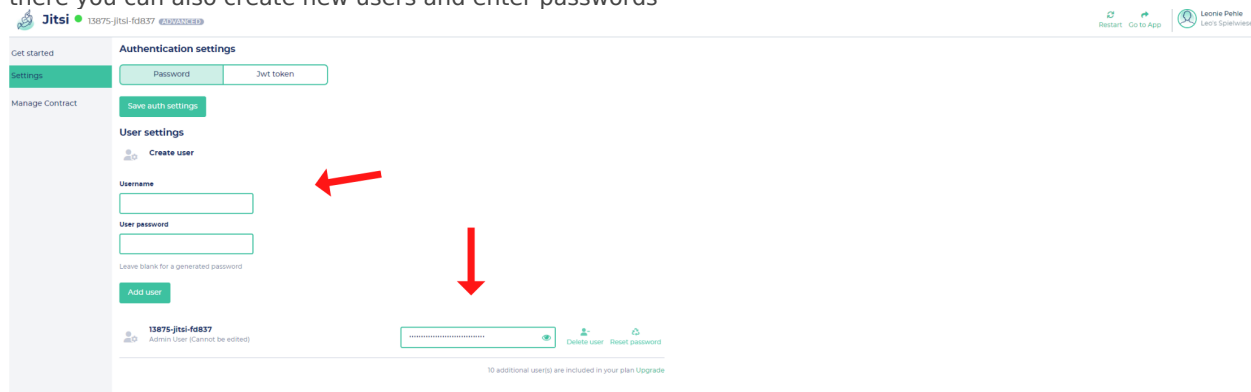

## Logging in

- click on the Endpoints Web-Link (or on the "Go to App"- button) to get to your Jitsi instance and you can start your first video conference right away

- when you start your first videoconference you will first be asked to enter your user name and password, which you can find under "Settings" -> to copy the password, you must first set it to visible
- there you can also create new users and enter passwords

# Moderators in NWS Jitsi

In our Jitsi app, only one moderator can create video conference rooms. To do this, he creates a conference room and to open it, he must enter his user name and password. After his successful entry, all other participants can join the call without entering a password.

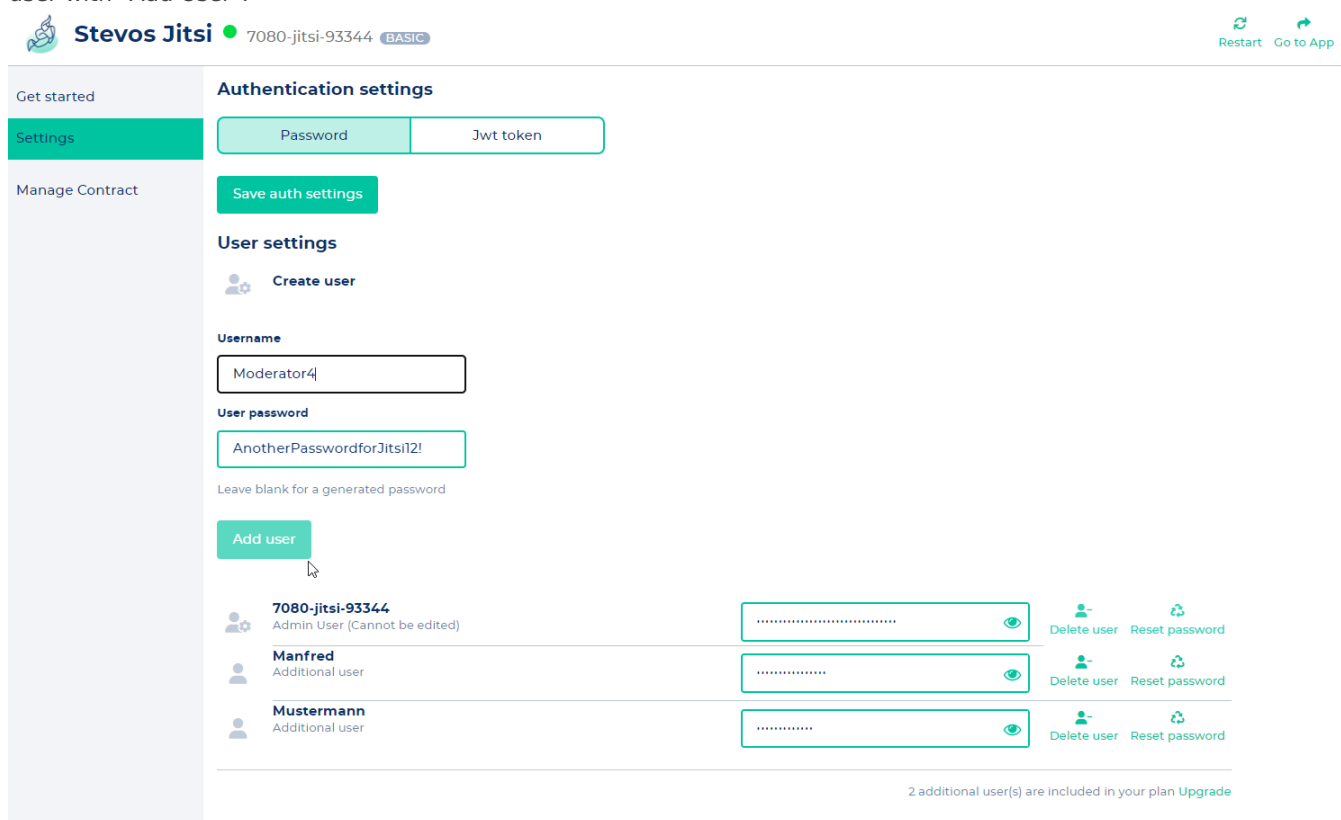

## Creating more moderators

By default, an admin user is always created when starting a Jitsi app. This user is not editable (name and password cannot be changed).

However, additional moderators can be created. The number of possible moderators depends on the started plan. The higher the plan, the more moderators can be created.

In the Customer Interface, go to Settings on your Jitsi app.

At the point "Customer Settings" you can now simply enter the desired username and user password and then add the user with "Add User".

	<b>Manfred</b> Additional user	.....		
	<b>Mustermann</b> Additional user	.....		

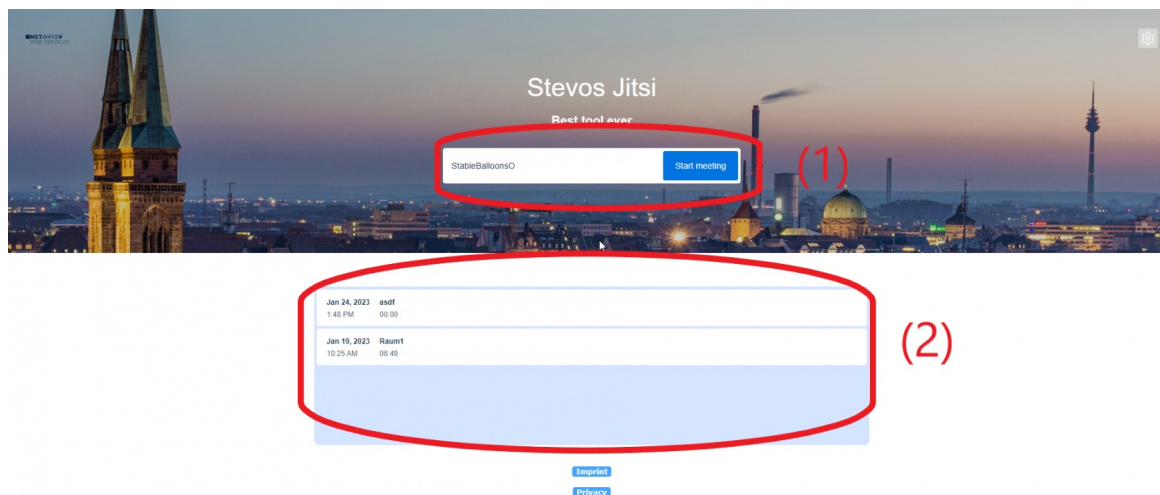

2 additional user(s) are included in your plan [Upgrade](#)

## Starting a video conference

[Log in](#) to your Jitsi app.

In the start menu you will find the input field to name your videoconference room (1). Enter the desired name here or just use the randomly suggested name. Go to "Start Meeting".

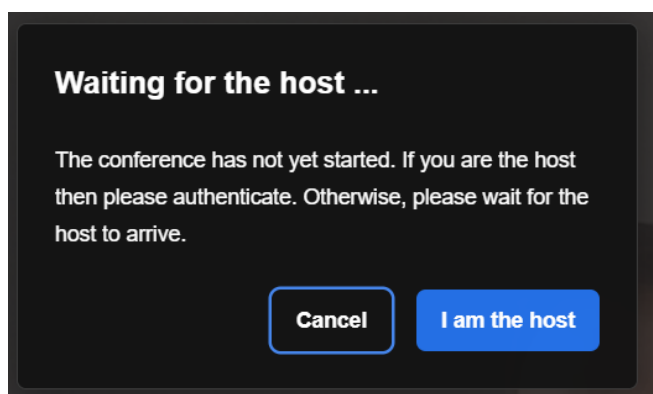

On the start menu you will also find a history of recent meetings (2). If you want to use one of the old meeting rooms again, just click on the room and it will open.

Now enter your name. You can also set various adjustments concerning Background-picture, microphone, camera and general settings. Click on "Join Meeting":

Now you have to confirm that you are the host (guests just have to wait till the host has opened the room) and then you have to enter your login data (username and password).
