High-IOPS PersistentVolumes

To use High-IOPS PersistentVolumes in your Managed Kubernetes Cluster you need to manually create a High-IOPS StorageClass and reference it in the PVC resources.

```
kind: StorageClass
allowVolumeExpansion: true
apiVersion: storage.k8s.io/v1
metadata:
  annotations:
    storageclass.kubernetes.io/is-default-class: "false"
  name: high-iops
parameters:
  type: Ceph-High-IOPS
provisioner: cinder.csi.openstack.org
reclaimPolicy: Delete
volumeBindingMode: Immediate
```
